COUNTER APP — TALLY & CLICKER · PRINTABLE SHEET

Bar Inventory Sheet

Full bottles plus the open bottle in tenths, against par

HOW TO USE

1. Count shelf by shelf in the same order every time: back bar, speed rail, store room.
2. Write full bottles, then estimate the open bottle in tenths (0.1–0.9). Total = full + open.
3. Order = par − total, rounded up to whole bottles or cases.

Bar / outlet _____ Date _____

Counted by _____ Period (week / month) ___

Product	Size	Par	Full bottles	Open (tenths)	Total	Order	Note
SPIRITS							
LIQUEURS & APERITIFS
