COUNTER APP — TALLY & CLICKER · PRINTABLE SHEET

# Field Survey Tally Sheet

Counts per section with effort and explicit zero records

## HOW TO USE

1. Record start and end time for every section or station. Effort (min) = end − start; without effort, counts cannot be compared.
2. Use one row per species or category per section. Use the same names as your protocol.
3. If a section has nothing to record, write one row and tick Zero. A zero is data; a blank row is not.

Site / transect _____ Date _____

Observer(s) _____ Method / protocol _____

Weather _____ Visibility / conditions _____

| Section / station | Start | End | Effort (min) | Species / category | Count | Unsure | Zero | Note (behaviour, habitat) |
|---|---|---|---|---|---|---|---|---|
| | | | | | | | ☐ | |
| | | | | | | | ☐ | |
| | | | | | | | ☐ | |
| | | | | | | | ☐ | |
| | | | | | | | ☐ | |
