COUNTER APP — TALLY & CLICKER · PRINTABLE SHEET

Photo Shoot Keeper-Rate Sheet

Frames and keepers per setup, for better quotes next time

HOW TO USE

1. Write each setup, look or product before the shoot, with the number of finals you need.
2. During the shoot, write start and end time and the frames shot. After the cull, write the keepers.
3. Keeper % = keepers ÷ frames × 100. Min per keeper = minutes ÷ keepers. Use both to quote the next job.

Client / project _____ Date _____

Photographer _____ Location / studio _____

#	Setup / look / product	Start	End	Frames shot	Keepers	Keeper %	Min per keeper	Note (light, lens, issues)
