COUNTER APP — TALLY & CLICKER · PRINTABLE SHEET

Warehouse Cycle Count Sheet

Blind count by bin, with a recount column and variance

HOW TO USE

1. Fill in the location and item columns before you walk the zone. Leave System qty folded or blank until after counting, so the count stays blind.
2. Count each bin and write Count 1. If it disagrees with the system quantity, have a second person recount and write Count 2.
3. Variance = final count − system qty. Explain every non-zero variance in the note column.

Zone / aisle _____ Date _____

Counted by _____ Checked by _____

Start time _____ End time _____

Location / bin	SKU / item	Unit	System qty	Count 1	Count 2	Variance	Initials	Note (reason for variance)

counterapp.online — the app version of this sheet. In the app, one counter per zone with a tag per bin keeps the same structure, and exports to CSV or Excel.
